Education

Cornell University, Ithaca NY

Expected May 2028

- College of Engineering, GPA: 3.80
 - Relevant Coursework: Differential Equations, Statics & Mechanics of Solids, Thermodynamics, Intro to Engineering Computing, Dynamics (IP), Linear Algebra (IP), Intro to Mechanical Design (IP)
-

Projects and Engineering Experience

Cornell Rocketry, **Structures Sub-Team Member**

September 2025- present

- Designed and validated 7 electrical-board mounts using SolidWorks along with a thermal regulation system for launch-critical electrical boards, reducing the maximum temperature of the electronics by 36%
 - Machined aluminum components using three-axis mills and lathes; trained in part setup, tolerancing, and manufacturing best practices
 - Iterated electrical board-mount designs through a three-stage process and presented designs to the team for review; incorporated feedback to improve effectiveness and manufacturability
 - Authored a technical report summarizing design progress and performance outcomes for the semester
-

Engineers In Action, Eswatini, **Construction Manager Internship**

December 2024- August 2025

- Developed an 8-week construction schedule for the Hlanganani Pilot Suspension Bridge Project using a Gantt chart; identified critical construction path and key milestones for on-time completion
 - Compiled a comprehensive bill of materials for the 48-meter bridge; coordinated material deliveries using the construction schedule
 - Led twice-daily construction meetings with 40+ contractors and volunteer employees to delegate daily tasks and mediate issues; overcame a significant cultural and language barrier when communicating construction-critical tasks
-

Work Experience

Crowe and Sons Electric Corporation, Lowell MA, **Electrician's Apprentice**

December 2021- August 2023

- Interpreted and implemented blueprint designs in a multi-million dollar Victoria's Secret renovation
 - Trained in electrical code, workplace safety procedures, and the operation of light-machinery
 - Coordinated with teams of various other tradespeople to minimize interference with each other's work
-

Campus Involvement

Cornell Physics Department, **Undergraduate Learning Assistant**

August 2025- present

- Participated in weekly educational strategy workshops and reflected on how to improve student learning; discussed how to approach and mediate realistic classroom scenarios
 - Applied learned teaching strategies weekly in 20-student Physics 1112 Mechanics and Heat discussion sections
-

Cornell Nuclear is Clean Energy, **Club Member**

September 2025- present

- Invited several guest speakers and organize guest speaker events on a variety of nuclear energy topics to campus for a nuclear-power career fair and speaker series with over 20 panelists
 - Compiled a nuclear fact sheet used to train new club members on the basics of the science and safety mechanisms behind nuclear power
-

Skills

Technical Skills: SolidWorks, AutoCAD, Fusion, Confluence, MATLAB, Python, Excel, 3D-printing, three-axis mill, lathe, electrical wiring, technical writing
